Other Site Characteristics

Este espacio natural, además del elevado valor que presentan al configurarse como humedales de gran importancia para las comunidades asociadas a ambientes húmedos, adquieren otro valor añadido por su fundamental contribución al aumento de la diversidad paisajística de la región. La Reserva Natural se extiende por la franja sur de la provincia de Sevilla siendo tres los condicionantes que determinan el carácter endorreico de estos humedales; una morfología plana que favorece la interrupción del drenaje de las aguas, la existencia de litofacies impermeables y un régimen climático con características de semiaridez local o regional.

4.2 Quality and importance

Presencia de hábitats de la Directiva 92/43/CEE. No incluye taxones de la Directiva 92/43/CEEI complejo endorreico de La Lantejuela, al estar incluido en el ámbito territorial de la ZEPA Campiñas de Sevilla, declarada en 2008, tiene también la consideración de ZEPA.
